PROFESSIONAL SUMMARY

Innovative Software Developer bridging robust backend API expertise with modern frontend architectures. Adept at transforming complex financial and healthcare logic into accessible, secure, and user-centric interfaces. While previously focused on data-driven solutions and machine learning to bridge the data-insight gap, I have pivoted my strong analytical skills and programming expertise toward full-cycle web integration and scalable deployment. Passionate about empowering businesses with strategic decision-making and leveraging culturally-responsive technology to solve critical challenges in the African healthcare sector.

SKILLS

Frontend & Web Technologies: React.js, JavaScript/TypeScript, Tailwind CSS, HTML/CSS, UI/UX implementation.

Backend & Cloud: RESTful API Development, Node.js, AWS Cloud infrastructure, Serverless deployments (Vercel).

Data & Systems Operations: Switch Systems Operations, Payment System Innovation, SQL, Tableau, Data Exploration.

Tools & Workflows: Git/GitHub Integration, JetBrains IDEs, Component-Driven Architecture, Agile/Scrum Collaboration.

PROFESSIONAL EXPERIENCE

IS Officer (Switch Systems)

November 2024 - Present

Commercial Bank of Ethiopia – Addis Ababa, Ethiopia

- Innovate and implement new methods to facilitate and enhance the customer card payment experience, integrating critical communication pipelines like the CBE PIN via SMS project.
- Create and deploy new systems for the company to streamline operations within the Switch Systems department, managing seamless data flow between core backend APIs and operational interfaces.
- Track and optimize performance data for enterprise information systems, ensuring maximum uptime and transaction reliability across financial networks.

Frontend & Deployment Projects (Independent / Academic)

April 2026

- Developed and managed the deployment of modern web interfaces (Project: smartschedulerui) hosted on Vercel, demonstrating hands-on experience with component-based UI structures, modern build pipelines, and debugging production environments.
- Integrated Git/GitHub workflows seamlessly with JetBrains IDEs to manage version control and streamline the CI/CD pipeline for web application updates.

Data Science Intern

June 2022 - October 2023

Commercial Bank of Ethiopia – Addis Ababa, Ethiopia

- Collaborated with interns to conduct exploratory data analysis using tools like Python and Tableau to visualize customer churn patterns, translating complex datasets into accessible, user-friendly dashboards.
- Co-developed a machine learning model for transaction prediction using Python libraries like scikit-learn and TensorFlow.

- Managed data exploration and feature engineering, which significantly improved the model's performance.
- Performed data mining on annual datasets to extract actionable insights and identify long-term patterns, ensuring high-quality data structures.

EDUCATION & CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02)

Issued: August 2024

BA, Computer Science and Engineering

September 2019 - June 2024

Adama Science and Technology University - Adama, Ethiopia

ALX Virtual Assistant Program Certificate

Issued: February 2026

VOLUNTEER ACTIVITIES & INTERESTS

Community Leadership: Active member of the Rotaract Club of Abugida, organizing general meetings and local service initiatives.

Education: Mentor and tutor children and adults in need to support community education.

Environment: Participate in environmental restoration by planting trees and educating others on sustainable practices.

Languages: Amharic (Native), English (Expert), German (Beginner).

Interests: Writing Poetry, Drawing, Reading, Participating in online courses, Digital Gaming.
